ABOUT ME

I am a dedicated and resourceful IT professional with experience in software development, hospital information systems, and technical support. Skilled in troubleshooting and maintaining computer systems, networks, and office equipment including printers and scanners. I have hands-on experience with web and mobile development using frameworks such as Laravel, Vue.js, and React Native, as well as database management with MySQL and PostgreSQL. My background includes working in healthcare and business environments, providing me with both technical expertise and practical problem-solving skills. I am eager to contribute my knowledge in IT support, system development, and technical services while continuously learning and growing in the field of information technology.

EDUCATION

EASTERN SAMAR STATE
UNIVERSITY - SALCEDO

Bachelor of Science In Information
Technology

2020 - 2024

SKILL

- **Software Development**
 - React.js
 - Vue.js
 - Django
 - Node.js
 - PHP (Laravel & Native)
 - Firebase
 - Tailwind
 - Bootstrap
 - Mysql
 - PostgreSQL
 - SQLite
 - PhpMyadmin
 - Docker
 - Visual Studio Code
 - Android Studio
- **IT Support**
 - Troubleshooting
 - Printers
 - Scanners
 - Networks
 - Encode
 - Microsoft Tools(Excel, Word)

WORK EXPERIENCE

- Software Developer/IT Specialist -
Salcedo Doctors Hospital**

OCTOBER 2024 - JULY 2025

I developed and maintained several hospital information systems to improve operational efficiency. This includes creating an Inventory Management System to track medical supplies and equipment, as well as configuring and maintaining the OpenMRS system—an open-source medical records platform tailored for hospital use. I also provided technical support by troubleshooting and maintaining printers across departments. In addition, I built a Laboratory Information System (LIS) to manage lab requests and results, and developed a Medical Certificate Generator System to streamline the issuance of official medical documents.
- Software Developer -
Scibiz Informatics**

APRIL 2024 - MAY 2024

I worked as an intern at Scibiz Informatics from April to May 2024, where I contributed to a project using Vue.js and Django. This experience enhanced my skills in web development and teamwork.
- Software Developer -
Freelance (Self Employed)**

August 2023 - February 2024

I build freelance capstone projects using native PHP for web systems, Android Studio with Firebase for mobile apps, and React.js with Node.js. I use MySQL and SQLite for database management, delivering complete and functional solutions for academic and practical use.
